

A new folding trolley joins the Kartell collection. Brilliant and multifunctional, Flip is a winning combination of the plastic of the trays and the metal of the structure.

The PMMA trays are available in opaque or transparent colour with a lenticular contour, for the ultimate in functionality and aesthetics.

Flip can be used as a trolley, for serving cocktails and buffets, but also as a practical and versatile side table, since each of its trays can be used independently of the others. It folds away for easy storage.
